

## ECCP Updates

The Early Childhood Consultation Partnership (ECCP) has developed a new way to continue to support ECE Centers and Family Based Child Care Providers with a virtual version of ECCP!

Our program was redesigned in response to the COVID-19 Pandemic to support you while respecting your needs to keep outside providers out of your centers while you are open or reopening.

**We are open for referrals at this time!**

**Our ECCP Consultants are still working and can support you with:**

- Plans to re-open
- Responding to high stress needs of staff or children
- Mixed age range classrooms
- Social Emotional strategies
- Challenging behaviors of children
- How to connect remotely with children and families

**New ECCP Services:**

**Phone Intervention:** ECCP has designed a way to support any caregiver of children with two telephone consultation sessions to address a concern of the caller related to their center or family based provider or a specific child's issue, depending on whom the caller is. This is a confidential service. Resources and referrals will be provided as needed.

**Teleconsultation Child Intervention:** ECCP has designed a brief virtual version of our normal ECCP Child Specific Service for any child who is attending an ECE Center or Family Based Child Care Provider, either virtually or in person. This service will be provided to families and providers who are struggling with the child's current social emotional state. Typical presentations could include, but are not limited to, challenging behavioral concerns, family stressors, difficulties in the ECE center/family child care setting.

**Teleconsultation Center Wide Intervention:** ECCP has developed a whole new service to respond to the needs of ECE Centers who are in any stage of being open or planning on opening. This service will be provided to ECE centers who are open with or without children present on a daily basis. ECE directors and other administrative staff will receive support around the current dynamics of working under the COVID-19 structures. Various topics may include: Social Emotional Support, Classroom Structure, Physical Space, Mixed Age Ranges, Stress Management/Self Care.

As always, ECCP Consultants will continue to provide Triage and Referral for any callers that are in need of a variety of Social Emotional resources, including websites, strategies, virtual ECE teacher trainings, virtual community trainings, virtual mental health consultation groups, or referrals to other mental health programs.

ECCP will continue to provide Teleconsultation throughout the summer months and will review a return to normal operations in the fall.

Please check out our newly updated website at [www.eccpct.com](http://www.eccpct.com) for more information and to find the ECCP Consultant in your area.

We are open for new referrals in all programs across the state. Please contact us for more information.
